

A TRIP TO THE DIAMOND GLASS WORKS

On September 17, 1960, Cub Pack #261 went to the Diamond Glass Works. There, the guide showed how glass was made from powder and then it was re-fined. They saw how it was shaped into many different articles, such as liquor bottles, salt shakers, and medium-size bottles.

After the tour each cub scout was given a bottle , a book about glass, and a set of salt and pepper shakers.
